

These issues require your immediate attention

We detected security vulnerabilities across your projects that could expose your data to unauthorized access. **Review and fix them before your data is compromised.**

Issues as of 30 Mar 2026:

CRITICAL ISSUE

Table publicly accessible

Anyone with your project URL can read, edit, and delete all data in this table because Row-Level Security is not enabled.

`rls_disabled_in_public`

PROJECT

vibe-caffe

uevakhbqxujzqimaoytx

Resolve issue

If these are not intentional, **they could result in unauthorized access to your database.** We have a robust set of security checks which you can read about in [our docs](#).

Reach out to [our support team](#) if you have any questions.

Regards,
The team at Supabase
