

VIBE CAFFE

Documentatie Tehnica Amanuntita v2.0

Student: 2020nc | Data: 2026-04-04 (editia finala — Sesiunea 5 Bloc E) |
Curs: Vibe Coding

Site: vibe-website2.vercel.app | Repo: github.com/2020nc/vibe-website2

1. INTRODUCERE SI CONTEXT

Proiect web full-stack pentru cafenea fictiva Vibe Caffe, realizat in cursul Vibe Coding (dec 2025 - apr 2026).

Metodologie: Vibe Coding — student decide, AI (Claude Sonnet 4.6) implementeaza.

Cifre cheie:

- 50+ commit-uri Git pe main
- 9 pagini publice + 2 pagini admin
- 15+ componente React (server + client)
- 5 API Routes + 5 tabele Supabase

2. STACK TEHNIC

Front-end: Next.js 16 (App Router), React 19, TypeScript 5 strict, Tailwind CSS 4, Lenis smooth scroll

Back-end: Supabase (PostgreSQL cloud), Next.js API Routes, BNR XML feed (curs valutar), bcryptjs

DevOps: Vercel (CI/CD automat), GitHub (version control), Vercel Environment Variables

3. ARHITECTURA

Browser -> Next.js Server (Vercel) -> Supabase (PostgreSQL)

Server Components: SSR, metadata, JSON-LD (fara JS pe client)

Client Components: interactivitate (filtru meniu, dark mode, wizard rezervari)

API Routes: /api/curs, /api/newsletter, /api/rezervari, /api/promo

Middleware: protectie /admin/* cu cookie httpOnly

4. BAZA DE DATE SUPABASE — 5 tabele

- menu_items: id, name, price, category, description, image, vegan, discount, addons, tag
- rezervari: id, name, email, phone, date, time, guests, message, status, created_at
- newsletter_subscribers: id, email UNIQUE, subscribed_at
- holiday_config (id=1): active, holiday_name, items JSONB
- promo_config (id=1): active, message, bg_color, text_color

Nota: coloana tag adaugata in sesiunea 2026-04-04 cu ALTER TABLE menu_items ADD COLUMN IF NOT EXISTS tag TEXT

5. PAGINI SI FUNCTIONALITATI

/ Homepage SSR: Hero, ReviewBar (4.9/5), "De ce Vibe?", preview meniu, oferte sezoniere, CTA, locatie rapida

/meniu Client: filtre categorii, toggle 3/4/5 col, EUR/USD, badge-uri comerciale,

reduceri, add-on-uri

/rezervari: wizard 3 pasi (date personale -> detalii -> confirmare), INSERT Supabase

/locatie: metadata SEO, Google Maps embed, 3 CTA-uri, mini-FAQ, galerie, facilitati

/sarbatori: 4 oferte sezoniere, animatie confetti, configurabila din admin

/admin (protejat): tab Rezervari (export Excel/PDF), tab Meniu CRUD, tab Sarbatori, tab Setari banner

/confidentialitate, /cookies, /termeni: pagini legale statice

6. SEO TEHNIC

- metadata title + description per pagina (9 pagini)
- OpenGraph tags (og:title, og:description, og:url, og:siteName)
- JSON-LD CafeOrCoffeeShop pe homepage (Schema.org)
- app/sitemap.ts -> /sitemap.xml automat (8 URL-uri publice)
- public/robots.txt: Disallow /admin, /api/

7. SECURITATE

- middleware.ts: redirect /admin/* -> /admin/login daca nu exista cookie admin_token valid
- Cookie httpOnly: nu accesibil din JavaScript (protectie XSS)
- ADMIN_SECRET in env vars Vercel (niciodata in git)
- Supabase anon key (permisii limitate prin Row Level Security)

8. SESIUNI DE LUCRU

Sesiunea 2026-04-03 — 7 Sprinturi:

S1: Protectie /admin (middleware + login + ADMIN_SECRET)

S2: Homepage SSR (server component, metadata, JSON-LD)

S3: /rezervari cleanup (eliminat sectiunea admin din pagina publica)

S4: /menu si /sarbatori (pagini noi server component)

S5: /locatie (metadata, 3 CTA, mini-FAQ)

S6: Navbar link "De ce Vibe?" cu active tracking

S7: Pagini legale + robots.txt

Sesiunea 2026-04-04 — 6 Prompturi optimizare:

P1: Sitemap XML (app/sitemap.ts, 8 URL-uri)

P2: Fix duplicare produse meniu (deduplicare Set category__name)

P3: Descrieri bogate carduri meniu + SQL Supabase UPDATE

P4: Badge-uri comerciale (Bestseller/Sezonier/Signature/Staff Pick) + coloana tag Supabase

P5: ReviewBar Server Component (4.9/5, 340+ recenzii, 3 testimoniale)

P6: CTA secundar rezervare pe homepage (banda teal + buton orange)

9. DECIZII TEHNICE

- App Router vs Pages Router: Server Components native, performanta, SEO mai bun
- Supabase: PostgreSQL managed, API REST automat, dashboard vizual
- Cookie httpOnly vs JWT localStorage: standard industrie, protectie XSS
- Deduplicare in cod vs stergere DB: sigura, reversibila, fara risc de pierdere date
- ReviewBar Server Component: date statice in HTML initial, crawlabile de Google

10. CONCLUZIE

Vibe Caffe este o aplicatie web completa, de nivel productie, care acopera:

- Front-end modern (React 19, Next.js 16, TypeScript, Tailwind, dark mode)
- Back-end real (Supabase PostgreSQL, API Routes, BNR feed, cache)
- Securitate (middleware, cookie httpOnly, env vars)
- SEO complet (metadata, OpenGraph, JSON-LD, sitemap, robots)
- CI/CD profesional (Git + Vercel automat)
